Film Making Course for Beginners

This course has been designed for beginners with little or no knowledge of film making. The course covers all the major aspects of film making including screenplay writing, story boarding, camera movements, direction, lighting setups, sound recording, editing, background scores etc.

The course prepares the participants to be able to shoot their own short films and professional videos with any basic camera set up. Participants learn film making within a fully equipped professional shooting set up. Varieties of practical exercises and shoots are conducted throughout the course teaching students the step by step process of film making.
