Photography Course
For Beginners

Photography Course for Beginners

This course has been designed for beginners with little or no knowledge of photography. The course covers all the major aspects & techniques of professional photography, including frame composition, lighting techniques, key camera settings, green screen photography, use of different lenses, type of shots, camera angles, photo editing in Adobe Photoshop etc.

Participants learn to professionally shoot & edit photos in a fully equipped shooting set up. Varieties of practical exercises & shoots are conducted throughout the course with models & green screen setup, preparing students for professional assignments. It's a great platform to network with professional models and other photographers.
